

MPower Partners Invests in UniFa's Series D Round

MPower Partners Fund, a global ESG-focused venture capital fund, has invested in the Series D round of UniFa Inc. (hereinafter referred to as "UniFa"), a company that uses the latest technologies to support safe and secure childcare environments.

Childcare centers play an important role in the social infrastructure for working families, and reducing the massive burden on childcare workers, including handwritten activities, is an important societal challenge.

UniFa's technology reduces the workload of childcare workers and hence helps create an environment that ensures high quality childcare, and MPower Partners has been inspired by UniFa's purpose.

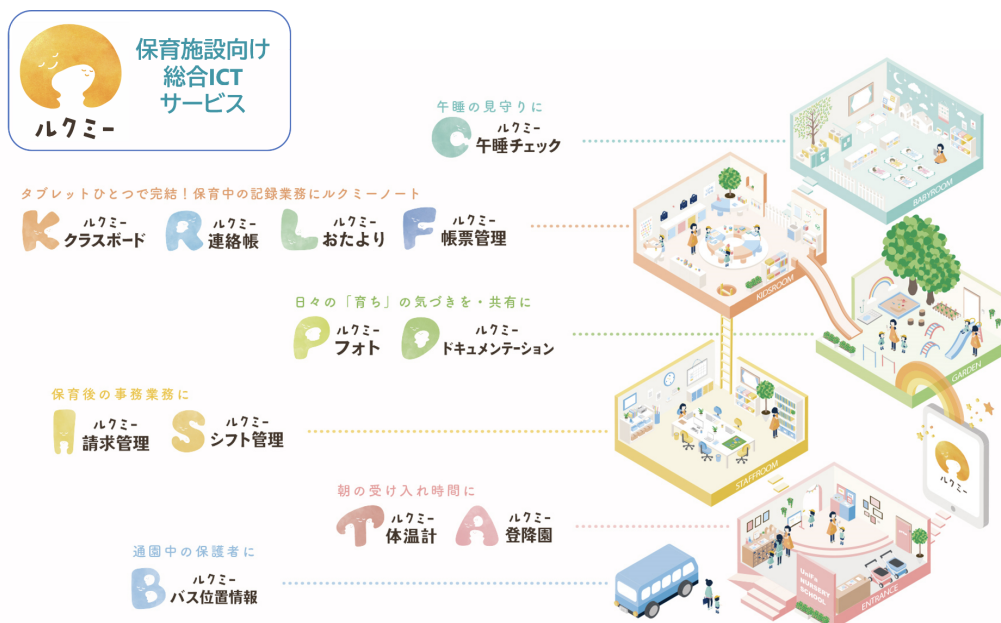

We look forward to working together to solve social issues, expand the childcare industry alongside supporting their business to grow.

Comment from Naoto Hoshi, Board Director/CFO, UniFa

As a startup which solves societal challenges by promoting DX and providing a total packaged solution for childcare facilities, UniFa is driven by our purpose of "creating new infrastructure for society that brings happiness to families around the world".

In this Series D round, we have set ESG as one of our major themes, and we feel very honored to have received investment from MPower Partners, which has a deep understanding and global expertise in ESG investment.

We look forward to working together to promote sustainable ESG management, even as a start-up, and aim to solve child-care related social issues, whilst also maximizing enterprise value.
